

Radiant Systems offers attractive and durable custom-designed cash drawers manufactured by Bixolon, providing the reliability, functionality, and compatibility needed for your restaurant operations. Features of the 16-inch cash drawer include a heavy duty steel enclosure, an open/close status sensor, and a choice of either a 12V or 24V direct drive interface. The cash drawer can accommodate either a five-bill, five-coin till with dedicated coin roll storage area, or a four-bill, eight-coin adjustable till ideal for use in countries that have more coin types or wider bills. A detachable interface cable, stainless steel drawer front, dual media slots, and a three-function lock are all included.

Unify your operations with these appealing cash drawers manufactured by Bixolon specifically for Radiant Systems, which integrates easily with your existing Radiant POS terminal.

FEATURES AND BENEFITS

- The “Radiant Black” color matches perfectly with your existing Radiant POS terminals and peripherals, providing an attractive and unified appearance to your customers.
- Heavy duty steel enclosures provide a strong and stable platform for the POS terminal and peripherals.
- Interface port located on the bottom of the cash drawer hides the cable exit from the customer’s view.
- Detachable cable makes servicing and supporting the drawer an easier process.
- Direct drive interface eliminates the need for a power supply or separate power cord.
- Dual media slots in the drawer front and dedicated coin roll storage in the till provide efficient media storage.

INSTALLATION & COMPATIBILITY

An area of no less than 16.1"W x 16.3"L x 4.3"H is recommended to properly install the cash drawer. Additional clearance is required in front of the drawer to allow the drawer to open accordingly. An optional mounting bracket kit for under-the-counter installation is also available. The optional mounting bracket matches the color of the cash drawer, and a template is included to simplify installation. The mounting bracket provides sufficient space between the top of the drawer, and the bottom of the counter for running cables.

The 12V models are compatible with Radiant's P-series POS terminals and must be connected to a dedicated cash drawer port on those terminals. The 24V models are compatible with Bixolon, Epson, and other compatible receipt printers and must be connected to the cash drawer kick-out port on those printers. The 24V models are also compatible with Radiant's Columbus, Quest, and Q-series POS terminals and must be connected to a dedicated cash drawer port on those terminals.
